

Forum Africa Centre

The Forum Africa Centre (FAC) brings together scientists at the Julius-Maximilians-University Würzburg who have been working closely with partners in Africa for many years. The FAC has set itself the goal of bundling all research activities and collaborations, networking them with one another, making them known to the public, and thus providing an insight into the cultural and scientific landscapes of the African continent.

Young Africa Centre

The Young Africa Centre (Junges Afrikazentrum, JAZ) within the Forum Africa Centre serves as a platform for all students interested in Africa, doctoral candidates, and all members of the academic mid-level faculty. The JAZ publishes the “Junges Afrikazentrum” series and organizes colloquia, lectures, and discussion evenings.
